DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.
3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being ASAKA et al. US 2004/0055553 A1.

Asaka et al. discloses a system and method of starting and engine wherein the kinetic energy of combustion is predicted based on air fuel mixture, temperature, friction etc. kinetic energy is analogous to state of crank term claimed. A difference between an estimated kinetic energy output and a predetermined target (e.g. energy predetermined for starting engine without starter) is determined. The starter then supplies the difference to engine.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure the art are various engines that start without a starter.
